

Energy.To You.

About Us

Wattz On Energy (Pty) Ltd is a privately-owned, owner-managed power product and aftersales support provider. Our core focus is to supply value-for-money power solutions with an emphasis on technical aftersales support. We've identified a key problem in our industry. This being that finding a supplier of a power product is relatively easy but too often the end user is either supplied a solution that is either incorrectly sized or experiences a general lack of aftersales support...or both.

With this in mind, and with the founding member having managed some of the leading Generator OEMs in South Africa, at the beginning of 2022 Wattz On Energy was established.

Our partnerships and relationships with some of the leading global brands in power generation ensure that we are able to provide power generation products ranging from Petrol and Diesel generators (more suited for domestic and small businesses) to larger power solutions for industrial applications. We will assess your requirement, supply the most suitably-sized solution, Deliver, Install and provide you with ongoing service and support.

Energy. To You.

Our Commitment

- Value For Money Solutions
- Customer Service Satisfaction
- Reliability - 24/7 Support
